- Opinion No. 5302/F. Proegk.464106_1/11-12-2013 of the Special Service for the Sector of Health & Social Solidarity on the draft decision for the implementation of sub-project 1 entitled "Redesigning and Developing the HCR in the hospitals and private clinics of Greece" of operation "Development of the Hellenic Cancer Registry"
- The resolution of the 16th Meeting of the Board of Directors of HCDCP dated 16-12-2013 approving and consenting to the draft decision on the use of own resources for sub-project 1 entitled "Redesigning and Developing the HCR in the hospitals and private clinics of Greece" of operation "Development of the Hellenic Cancer Registry"

CALLS THE PARTIES INTERESTED IN WORKING UNDER A "CONTRACT FOR SERVICES GOVERNED BY PRIVATE LAW"

to submit anew expression of interest to be employed under a contract for services governed by private law and provide services in the context of the implementation of sub-project 1 entitled "Redesigning and Developing the HCR in the hospitals and private clinics of Greece" of operation "Development of the Hellenic Cancer Registry", which falls under the O.P. "Public Administration Reform 2007 – 2013". This is a co-funded project, financed by the European Social Fund (ESF) and the national budget.

AN OVERVIEW OF THE SUB-PROJECT

Scope

The sub-project involves the organization and operation of the Hellenic Cancer Registry (HCR), which is a systematic collection of data on new cancer cases, among all age-groups and the entire population of Greece, from primary and secondary sources of the Public and Private Sector. The HCR is the main source of information helping to plan a national strategy and policy for cancer.

Data will be collected by all public and private hospitals in Greece, in order to create a complete register of cancer cases and draw reliable population-based conclusions. Health officials, mainly health visitors, already employed as permanent hospital staff, will carry out the registrations and will act as "cancer registrars". The registrars will have a responsibility to collect the data required by the HCR, enter the collected data in a single, web-based information system and work closely with the Oncology Committees of the Hospitals and Private Clinics. The registrars will keep an open line of communication with HCR's office in HCDCP, so as to be able receive continuous support, education and training.

HCR has obtained an authorization by the Hellenic Data Protection Authority and operates in accordance with current legislation on confidentiality and the handling of sensitive personal information about patients.

The specific objectives of the sub-project, which will contribute in achieving the overall objective, are:

- Register new cancer cases on an annual basis,
- Monitor morbidity and mortality caused by cancer in the different areas of the country in a longitudinal manner.
- Classify cases according to stage at the time of diagnosis and evaluate the timely diagnosis of the disease at a national and regional level,
- Draw conclusions on the initial treatment strategies used for cancer patients,

- Follow-up the disease and interconnect with the Hellenic Statistical Authority (ELSTAT), the National Organization for Health Care (EOPYY) and, eventually, the Health Care Map,
- Interconnect with screening programmes against cancer,
- Prepare and publish an annual report for the Ministry of Health, providing information on the frequency of cancer cases, mortality rates and the course of the disease in Greece,
- Carry out and promote research in order to acquire specialized knowledge of risk factors, in their diagnosis and natural evolution, as well as the results of treatment, in order to improve prevention measures and provide high-standard care and treatment,
- Provide training, guidelines, support and any other type of assistance to the registrars of the Hospitals and the Hospital Oncology Committees in the private and public sector so as to allow them to perform their tasks in the most effective manner,
- Constantly provide adequate information and evidence to health agencies, institutions and organizations, health professionals and scientists, lobbies and the public in general, about cancer and any measures which could contribute in preventing the disease,
- Exchange information with and provide anonymous comparable data to international organizations, such as WHO, IACR,

Sub-project 1 "Redesigning and Developing the HCR in the hospitals and private clinics of Greece" includes the following specific actions:

- i. Action 1: Describe the current state of affairs in Greece as regards cancer.
- ii. Action 2: Design and Develop a HCR documentation on the basis of international standards
- iii. Action 3: Train new Codifiers, support the network of registrars and codify the cancer cases recorded in the Registry
- iv. Action 4: Train the registrars
- v. Action 5: Train the permanent staff of HCR
- vi. Action 6: Prepare and carry out studies
- vii. Action 7: Ensure the scientific monitoring of the project
- viii. Action 8: Design and develop a quality control programme for the available data.
- ix. Action 9: Develop an information security management system in compliance with ISO/IEC 27001:2013.
- x. Action 10: Other services

DETAILED JOB DESCRIPTIONS OF SPECIALISTS

We hereby invite anew all interested parties to study the short description of the project and submit their Expressions of Interest in the form of an application (see annex I) to be employed as scientific expert under a contract governed by private law and produce the deliverables set out in the relevant decision

for the implementation of the project with the use of own resources or some or the entirety of the interim deliverables that will precede the final deliverables during the implementation of the proposal, so that the following positions are covered:

	POSITION CODE	SPECIALTY	EMPLOYMENT STATUS	NUMBER OF PERSONS
TEAM OF SPECIALISTS	EP-EAE	Expert in foreign registries	Contract Services for	2

The detailed qualifications required for the above positions and any additional qualifications desired are described below:

TEAM OF SPECIALISTS

Specialties:

-Expert in foreign registries (CODE: EP-EAE)

Scope:

With regard to the scientific monitoring of the project, a Team of specialists will be created, which will be monitoring the project throughout the whole period of its implementation. The team will consist of an expert in public health issues and two internationally acclaimed experts from foreign Cancer Registries, all of them employed as freelancers. Among others, the team will be called upon to:

- Monitor and evaluate the progress and success of the project at regular intervals, on the basis of the technical specifications and the time-schedule that were defined when the project was designed, and intervene by making corrections, whenever it is necessary and possible.
- Prepare annual progress reports presenting the data collected, a statistical analysis of the results, the issues identified and the corrective actions implemented.

The eligibility criteria on the basis of which the applicants will qualify for two (2) positions of Expert in foreign registries with **CODE: EP-EAE** are as follows:

Minimum required qualifications:

- Undergraduate Degree in Science or in Health Science
- At least two years of experience as Director-Head of Cancer Registry
- Doctorate Degree in epidemiology, oncology, public health or in similar research fields
- Fluency in the English language

Additional desired qualifications

- Participation in epidemiological studies for cancer
- Publication of scientific papers in highly acclaimed international journals or other publications of recognized value (e.g. monographs, books) attesting to a rich research background in the field of cancer

EVALUATION PROCESS

The applications will be reviewed by an evaluation committee which will consist of three members and will be set up for this purpose. The committee will evaluate the candidates on the basis of the required and desired qualifications as listed per specialty in this call. The Committee will have the right to request supplementary information and clarifications as regards the supporting documents submitted by the candidates or even the submission of additional documents if it is deemed necessary. It should be noted that this Call for expressions of interest and submission of proposals for the provision of services is not a tender and the parties selected will be employed under a contract for services following acceptance of their proposal and not recruited as staff. When the evaluation process is completed a "ranking list" or "list of successful candidates" will be published on the HCDCP website, while all successful applicants will be notified personally. In the event of any applicants being considered of equal merit, preference will be given to the proposal of the applicant who has the longest research experience.

It should be noted that the candidates who do not have the minimum required qualifications will be automatically excluded from further evaluation.

GROUND FOR REJECTION OF EXPRESSIONS OF INTEREST

We shall not consider any expression of interest from applicants who:

1. Have been convicted for felony and have been imposed a sentence for theft, embezzlement (common or in service), fraud, extortion, forgery, bribery, suppression, infidelity in service, breach of duty, malicious calumny, crime against sexual freedom or financial exploitation of sexual life.
2. Have been indicted under a final bill for felony or misdemeanour for the offences of item 1, even if the offence is statute-barred.
3. Have been disenfranchised due to the above conviction, for the whole duration of such

- disenfranchisement.
4. Are under privative judicial support (full or partial), auxiliary judicial support (full or partial) or combined judicial support.
 5. Are not healthy in accordance with the provisions of article 7 of Law 3528/2007 Government Gazette Part A No 26).
 6. Have been dismissed due to a disciplinary offence.

TEAM OF SPECIALISTS
