Notification forms and case definitions of the diseases included in the tables can be found at the website of the Hellenic Center for Disease Control and Prevention (HCDCP) ([www.keelpno.gr](http://www.keelpno.gr)). It should be noted that the data for July 2011 are provisional and could be slightly modified/corrected in the future. Moreover, data interpretation should be made with caution, as there are indications of under-reporting to the system.

The Mandatory Notification System depends on physicians who, despite their work load, systematically report to the System.
