Notification forms and case definitions of the diseases can be found at the website of the Hellenic Centre for Disease Control and Prevention (HCDCP) (www.keelpno.gr). It should be noted that the data for June 2011 are provisional and could be slightly modified in the future, and that data interpretation should be made with caution because there are indications of under-reporting in the system. We would like to thank warmly the physicians who, despite their daily work load, systematically notify infectious diseases to the Department of Epidemiological Surveillance and Intervention of the HCDCP.
